Subject Index

P = Proceedings of the Anatomical Society of Great Britain and Ireland
(*dem*: Poster demonstration)

Accessory extensor carpi radialis muscle, Atypical course of the rare accessory extensor carpi radialis muscle (Khaledpour & Schindelmeiser) **184,** 161

Acetyl choline, The involvement of the CGRP receptor in acetylcholine-induced vascular relaxation (Scott & Chafe) **184,** 203, *dem*

Acoustic rhinometry, Acoustic rhinometry and the estimation of nasal cavity volume: validation by Cavalieri sectioning (O'Flynn & Mayhew) **184,** 189, *P*

Adrenal gland, Morphology and catecholamine content of the adult quail adrenal gland (Parker & Parker) **184,** 190, *P*

African elephant, The histology of the intestinal tract of the African elephant (*Loxodonta africana*) (Kotzé) **184,** 440

Ageing, The effect of age on dendrites in the rat superior cervical ganglion (Andrews, *et al.*) **184,** 111

Target specificity in the morphology and growth of dendritic arbors of sympathetic neurons during development and ageing (Andrews & Cowen) **184,** 186, *P*

Myelinated and ummyelinated axon numbers in the vagus nerve trunks of young and aged rats (Soltanpour & Santer) **184,** 201, *dem*

Changes in the subodontoblastic capillaries of human dental pulp with increasing age (Daly, *et al.*) **184,** 439

Alcian blue, The chemical morphology of age-related changes in human intervertebral disc glycosaminoglycans from cervical, thoracic and lumbar nucleus pulposus and annulus fibrosus (Scott, *et al.*) **184,** 73

Aluminium, Morphological changes in the rat peripheral nervous system following chronic exposure to dietary aluminium (Davies, *et al.*) **184,** 200, *dem*

Amnion, Type IV collagen may integrate amnion layers in association with type VII collagen rivets (Ockleford, *et al.*) **184,** 191, *P*

Amoeboid microglia, Upregulation and induction of surface antigens with special reference to MHC class II expression in microglia in postnatal rat brain following intravenous or intraperitoneal injections of lipopolysaccharide (Xu & Ling) **184,** 285

Anatomical variation, Anatomical variation in position of the greater palatine foramen in the adult human skull (Ajmani) **184,** 635

An unusually medial axillary arch muscle (Dharap) **184,** 639

Anomalous insertion of abductor pollicus longus: case report (Çelik, *et al.*) **184,** 643

Atypical branches of the aortic arch and atypical course of the recurrent laryngeal nerves (Khaledpour & Krahn) **184,** 645

Anatomy teaching, Comparison of a video and a lecture in students' preparation for human dissection (Evans, *et al.*) **184,** 192, *P*

A comparison of levels of stress and arousal and causes of stress in first-year medical and science students at Cardiff (Fitzgibbon & Evans) **184,** 204, *dem*

A problem-based anatomy course for medical students (Scott) **184,** 205, *dem*

Angiogenesis, Embryonic avian endothelial cells, a new source of cells for in vitro angiogenesis research (Allen & Wilson) **184,** 194, *dem*

Anionic surface charge, Neutralisation of endothelial anionic surface charge leads to a breakdown of the blood–nerve barrier in the rat (Ghabriel, *et al.*) **184,** 191, *P*

Annulus fibrosus, The chemical morphology of age-related changes in human intervertebral disc glycosaminoglycans from cervical, thoracic and lumbar nucleus pulposus and annulus fibrosus (Scott, *et al.*) **184,** 73

ANP, Immunocytochemical localisation of ANP in the submandibular salivary gland and duodenum of the rat (Lourens, *et al.*) **184,** 435

Antelope, Morphology of intestinal villi in African antelope (Artiodactyla: Bovidae) (Woodall & Skinner) **184,** 519

Aorta, A note on the ascending aortic fold in the Chacma baboon, *Papio ursinus* (Lebona) **184,** 436

Aortic arch, Atypical branches of the aortic arch and atypical course of the recurrent laryngeal nerves (Khaledpour & Krahn) **184,** 645

APUD cells, Predisposition of immortalised neural precursor cells to an APUD-type differentiation pathway occurs prior to cessation of cell cycling (Foster & Stringer) **184,** 186, *P*

Arginine-vasopressin, Localisation of nitric oxide synthase and its colocalisation with vasoactive peptides in coronary and femoral arteries. An electron microscope study (Dikranian, *et al.*) **184,** 583

Articular cartilage, The development of diarthrodial joints and articular cartilage (Archer) **184,** 181, *P*

Articular cartilage: mechanisms of breakdown and repair and the role of biochemical markers to monitor these processes (Lohmander) **184,** 182, *P*

Quantitative morphology of the subchondral bone plate and the overlying articular cartilage in normal human patellae (Milz, *et al.*) **184,** 184, *P*

Ascending aortic fold, A note on the ascending aortic fold in the Chacma baboon, *Papio ursinus* (Lebona) **184,** 436

Astrocytes, Morphological specialisations of rat cranial nerve transitional zones (Fraher & O'Leary) **184,** 119

Studies of the ultrastructure and permeability of the blood–brain barrier in the developing corpus callosum in postnatal rat brain using electron dense tracers (Xu & Ling) **184,** 227

Atlas, The specialised craniovertebral joint of the sheep develops by modification of typical forms of atlas and axis (Lipetz & Presley) **184,** 184, *P*

The incidence of posterior atlas bridging in a black and white South African sample (Asvat) **184,** 437

ATPase, Ia antigens are expressed on ATPase-positive dendritic cells in chicken epidermis (Torres & Aldaco) **184,** 591

Atrophy, The effect of age on dendrites in the rat superior cervical ganglion (Andrews, *et al.*) **184,** 111

Autonomic ganglia, Colocalisation of NADPH-diaphorase with nitric oxide synthase and vasoactive intestinal polypeptide in newborn pancreatic neurons (Tay, *et al.*) **184,** 545

Autonomic neurons, Quantitative enzyme histochemical studies on autonomic neurons supplying the urinary tract in young adult and aged rats (Warburton & Santer) **184,** 200, *dem*

Axis, The specialised craniovertebral joint of the sheep develops by modification of typical forms of atlas and axis (Lipetz & Presley) **184,** 184, *P*

Axon, Dimensions of individual alpha and gamma motor fibres in the ventral funiculus of the cat spinal cord (Fabricius, *et al.*) **184,** 319

Axons, Morphometric analysis of axons myelinated during adult life in the mouse superior cervical ganglion (Little & Heath) **184,** 387

Baboons, A note on the ascending aortic fold in the Chacma baboon, *Papio ursinus* (Lebona) **184,** 436

A histological study of vascular canals in knee joint cartilages of young Chacma baboons (*Papio ursinus*) (Missankov) **184,** 437

A functional anatomical comparison of plantar-flexion of the digits in the hind feet in three species: *Homo sapiens*, *Papio cynocephalus* and *Pan troglodytes* (Grieve) **184,** 440

Bat, Skeletal muscle in the pineal gland of the bat, *Rhinopoma microphyllum*: an ultrastructural investigation (Bhatnagar) **184,** 171

Birds, Embryonic avian endothelial cells, a new source of cells for in vitro angiogenesis research (Allen & Wilson) **184,** 194, *dem*

Nitric oxide synthase neurons of the gastrointestinal tract of an avian species, *Coturnix coturnix* (Li, *et al.*) **184,** 261

Blood–brain barrier, Studies of the ultrastructure and permeability of the blood–brain barrier in the developing corpus callosum in postnatal rat brain using electron dense tracers (Xu & Ling) **184,** 227

Blood–nerve barrier, Neutralisation of endothelial anionic surface charge leads to a breakdown of the blood–nerve barrier in the rat (Ghabriel, *et al.*) **184,** 191, *P*

Blood vessels, The use of in oculo transplants to study the regulation of age changes in sympathetic perivascular nerves and their responses to nerve growth factor (Thrasivoulou & Cowen) **184,** 185, *P*

Are tumour blood vessels innervated? An immunohistochemical study utilising the neuronal marker protein gene product 9.5 (Mitchell, *et al.*) **184,** 187, *P*

Metabolic differentiation precedes vascular ingrowth into developing muscles in the embryonic chick forelimb (Orr & Wilson) **184,** 194, *dem*

The involvement of peptidergic innervation in the response of the rat mesenteric arterial bed to acetylcholine (Scott, *et al.*) **184,** 202, *dem*

Human perivascular nerves at the base of the brain (Bleys, *et al.*) **184,** 203, *dem*

The involvement of the CGRP receptor in acetylcholine-induced vascular relaxation (Scott & Chafe) **184,** 203, *dem*

The involvement of the CGRP receptor in acetylcholine-induced vascular relaxation (Scott & Chafe) **184,** 203, *dem*

Membrane-bound carbonic anhydrase (isoenzyme type IV) in fenestrated and nonfenestrated capillaries (Wolfensberger, *et al.*) **184,** 205, *dem*

Pharmacological actions of vasoactive substances contained in endothelial cells on human umbilical artery and vein (Sexton, *et al.*) **184,** 205, *dem*

A morphometric study on regional variation in the wall morphology of varicose long saphenous veins (Kent, *et al.*) **184,** 207, *dem*

Body size, Muscle at birth in mice selected for large and small body size (Brown & Stickland) **184,** 371

Bone, Quantitative morphology of the subchondral bone plate and the overlying articular cartilage in normal human patellae (Milz, *et al.*) **184,** 184, *P*

Skeletal evidence for juvenile mortality and growth in a medieval town (1070–1534) (Harrison & Wakely) **184,** 204, *dem*

Influence of the fibula on growth of the rat tibia (Ali & Dickson) **184,** 347

Bone blood flow, Haemodynamic changes in the rat femur and tibia following femoral vein ligation (Revell & Brookes) **184,** 625

Bone blood volume, Haemodynamic changes in the rat femur and tibia following femoral vein ligation (Revell & Brookes) **184,** 625

Bone growth, Influence of the fibula on growth of the rat tibia (Ali & Dickson) **184,** 347

Bos taurus, Spatial arrangement of the heart muscle fascicles and intramyocardial connective tissue in the Spanish fighting bull (*Bos taurus*) (Sánchez-Quintana, *et al.*) **184,** 273

Brain, Human perivascular nerves at the base of the brain (Bleys, *et al.*) **184,** 203, *dem*

Placental lactogen binding sites in the pregnant rabbit choroid plexus (Mangurian, *et al.*) **184,** 425

Brain capillaries, Studies of the ultrastructure and permeability of the blood–brain barrier in the developing corpus callosum in postnatal rat brain using electron dense tracers (Xu & Ling) **184,** 227

Brain grafts, Methods used to investigate fetal anterior hypothalamic grafts in the CNS of the adult rat (Meal & Parker) **184,** 187, *P*

Brainstem neurons, Asynchronous expression of catecholaminergic synthetic enzymes in rat brainstem neurons during prenatal maturation (Heap & Foster) **184,** 186, *P*

Broken Hill man, A modern counterpart to explain the left temporal bone lesion in Kabwe (Broken Hill) man (Slater & Kovacs) **184,** 436

Cadmium, Ultrastructural changes in kidneys of ducks exposed to cadmium and lead in combination (Prasada Rao) **184,** 437

Caesarean section, An early Caesarean operation (1800) that was performed by John and Charles Bell (Kaufman & Jaffe) **184,** 204, *dem*

Carbonic anhydrase, Membrane-bound carbonic anhydrase (isoenzyme type IV) in fenestrated and nonfenestrated capillaries (Wolfensberger, *et al.*) **184,** 205, *dem*

Cardiac muscle, Spatial arrangement of the heart muscle fascicles and intramyocardial connective tissue in the Spanish fighting bull (*Bos taurus*) (Sánchez-Quintana, *et al.*) **184,** 273

Cartilage, The development of diarthrodial joints and articular cartilage (Archer) **184,** 181, *P*

Articular cartilage: mechanisms of breakdown and repair and the role of biochemical markers to monitor these processes (Lohmander) **184,** 182, *P*

Quantitative morphology of the subchondral bone plate and the overlying articular cartilage in normal human patellae (Milz, *et al.*) **184,** 184, *P*

Optimising glycoconjugate stability, intracellularly in developing joint intermediate layer, and extracellularly in interlacunar network of skeletal rudiment cartilage (Lawton, *et al.*) **184,** 196, *dem*

Adult articular cartilage in *Monodelphis domestica*: an immunocytochemical study (Morrison, *et al.*) **184,** 197, *dem*
A histological study of vascular canals in knee joint cartilages of young Chacma baboons (*Papio ursinus*) (Missankov) **184,** 437
Cellular aspects of the development of diarthrodial joints and articular cartilage (Archer, *et al.*) **184,** 447
Problems and paradigms in joint pathology (Gardner) **184,** 465
Articular cartilage and osteoarthrosis. The role of molecular markers to monitor breakdown, repair and disease (Lohmander) **184,** 477
Cartilage growth plate, Influence of the fibula on growth of the rat tibia (Ali & Dickson) **184,** 347
Cat, Dimensions of individual alpha and gamma motor fibres in the ventral funiculus of the cat spinal cord (Fabricius, *et al.*) **184,** 319
Congenital diaphragmatic hernia in a cat (Louw) **184,** 438
Catecholamines, Asynchronous expression of catecholaminergic synthetic enzymes in rat brainstem neurons during prenatal maturation (Heap & Foster) **184,** 186, *P*
Morphology and catecholamine content of the adult quail adrenal gland (Parker & Parker) **184,** 190, *P*
Cats, Axon counts and sizes after lingual nerve injury and repair in cats (Andrade, *et al.*) **184,** 185, *P*
Cercopithecus aethiops, Linear correlates of cranial capacity in *Cercopithecus aethiops* (von Mayer) **184,** 436
Cerebellum, Fractionator estimates of Purkinje cell complements in mammalian cerebella (Mwamengele, *et al.*) **184,** 188, *P*
Large nerve cells with long axons in the granular layer and white matter of the murine cerebellum (Müller) **184,** 419
The effects of undernutrition on connectivity in the cerebellar cortex of adult rats (Yucel, *et al.*) **184,** 59
Cerebral cortex, Functional neuroanatomy of the human brain: positron emission tomography – a new neuroanatomical technique (Frackowiak & Friston) **184,** 211
An axosomatic and axodendritic multipolar neuron in the lizard cerebral cortex (Bernabeu, *et al.*) **184,** 567
Cerebral localisation, Functional neuroanatomy of the human brain: positron emission tomography – a new neuroanatomical technique (Frackowiak & Friston) **184,** 211
Cerebral ventricles, The ventricular system of the pigeon brain: a scanning electron microscope study (Mestres & Rascher) **184,** 35
Cervicobrachial plexus, The phrenic nerve in the rhesus monkey in the context of dorsoventral stratification within the cervicobrachial plexus (Akita, *et al.*) **184,** 187, *P*
CGRP receptor, The involvement of the CGRP receptor in acetylcholine-induced vascular relaxation (Scott & Chafe) **184,** 203, *dem*
Chacma baboon, A note on the ascending aortic fold in the Chacma baboon, *Papio ursinus* (Lebona) **184,** 436
A histological study of vascular canals in knee joint cartilages of young Chacma baboons (*Papio ursinus*) (Missankov) **184,** 437
Chick, A Phaseolus lectin anterograde tracing study of the tectorotundal projections in the domestic chick (Ngo, *et al.*) **184,** 129
Development of the chick thymus microenvironment: a study by lectin histochemistry (Fernandez, *et al.*) **184,** 137
Metabolic differentiation precedes vascular ingrowth into developing muscles in the embryonic chick forelimb (Orr & Wilson) **184,** 194, *dem*
Development of the *Ross* chick wing from stages 19 to 36: a scanning electron microscopical study (Murray & Wilson) **184,** 194, *dem*
A study of the normal development of the notochord in the chick embryo (Fegan) **184,** 195, *dem*
A new structure of possible neural origin in the chick embryo (*Gallus domesticus*) (Gouda & England) **184,** 195, *dem*
A study of premature neural fold elevation in the early chick embryo (Westacott & England) **184,** 195, *dem*
Effect of sodium valproate on neurulation in early chick embryos (Chia) **184,** 196, *dem*
Chick embryo, Assembly of the tendon extracellular matrix during development (Birk & Zycband) **184,** 457
Chicken, The effect of diazepam on the development of *Gallus* (Vorster, *et al.*) **184,** 435
Ia antigens are expressed on ATPase-positive dendritic cells in chicken epidermis (Torres & Aldaco) **184,** 591
Chimpanzee, Pattern differences in tooth development in chimpanzees and humans (Kuykendall) **184,** 438
A functional anatomical comparison of plantar-flexion of the digits in the hind feet in three species: *Homo sapiens*, *Papio cynocephalus* and *Pan troglodytes* (Grieve) **184,** 440
Chondrocyte, Regional and temporal changes in the synthesis of matrix metalloproteinases and TIMP-1 during development of the rabbit mandibular condyle (Breckon, *et al.*) **184,** 99
Chondrodysplasia, Problems and paradigms in joint pathology (Gardner) **184,** 465
Chondroitin sulphate, The chemical morphology of age-related changes in human intervertebral disc glycosaminoglycans from cervical, thoracic and lumbar nucleus pulposus and annulus fibrosus (Scott, *et al.*) **184,** 73
Choroid plexus, Placental lactogen binding sites in the pregnant rabbit choroid plexus (Mangurian, *et al.*) **184,** 425
Ciliary ganglion, The ciliary ganglion of the monkey: a light and electron microscope study (Zhang, *et al.*) **184,** 251
Ciliary muscle, Trigeminal innervation of the scleral spur in cynomolgus monkeys (Ruskell) **184,** 511
Circadian rhythms, Neural connections of the suprachiasmatic nucleus and medial hypothalamus of the Syrian hamster (*Mesocricetus auratus*) (Orpen & Steiner) **184,** 23
Circumventricular organs, The ventricular system of the pigeon brain: a scanning electron microscope study (Mestres & Rascher) **184,** 35
Cleft palate, Tissue deficiency during drug-induced cleft palate formation in the rat (Singh, *et al.*) **184,** 192, *dem*
Cleidocervical muscle, Case report: the cleidocervical muscle with speculation as to its origin (Tomo, *et al.*) **184,** 165
Collagen, Assembly and deposition of collagenous matrices (Birk) **184,** 181, *P*
Type IV collagen may integrate amnion layers in association with type VII collagen rivets (Ockleford, *et al.*) **184,** 191, *P*
Spatial arrangement of the heart muscle fascicles and intramyocardial connective tissue in the Spanish fighting bull (*Bos taurus*) (Sánchez-Quintana, *et al.*) **184,** 273
Cellular aspects of the development of diarthrodial joints and articular cartilage (Archer, *et al.*) **184,** 447
Assembly of the tendon extracellular matrix during development (Birk & Zycband) **184,** 457
Articular cartilage and osteoarthrosis. The role of molecular markers to monitor breakdown, repair and disease (Lohmander) **184,** 477
The joint capsule: structure, composition, ageing and disease (Ralphs & Benjamin) **184,** 503
Structural aspects of the reversal phase of alveolar bone remodelling (Kang, *et al.*) **184,** 607
Colocalisation, Localisation of nitric oxide synthase and its colocalisation with vasoactive peptides in coronary and femoral arteries. An electron microscope study (Dikranian, *et al.*) **184,** 583
Colon, Fibre optic confocal imaging (FOCI) for subsurface microscopy of the colon in vivo (Delaney, *et al.*) **184,** 157
Distribution of heat-stable enterotoxin/guanylin receptors in the intestinal tract of man and other mammals (Krause, *et al.*) **184,** 407
Colorectal crypt epithelium, Stereological estimation of nuclear volumes in the normal human colorectal crypt epithelium (Morais, *et al.*) **184,** 207, *dem*
Condyle, Regional and temporal changes in the synthesis of matrix metalloproteinases and TIMP-1 during development of the rabbit mandibular condyle (Breckon, *et al.*) **184,** 99
Confocal microscopy, The effect of age on dendrites in the rat superior cervical ganglion (Andrews, *et al.*) **184,** 111
Problems and paradigms in joint pathology (Gardner) **184,** 465

Conjoint tendon, Qualitative and quantitative analysis of the conjoint tendon (Leow, *et al.*) **184,** 199, *dem*
Connective tissue, Glycosaminoglycans within the periodontal connective tissues of the ovine incisor (Walker, *et al.*) **184,** 198, *dem*
Regional variations in the connective tissues of human peripheral nerves (Clatworthy, *et al.*) **184,** 200, *dem*
Spatial arrangement of the heart muscle fascicles and intramyocardial connective tissue in the Spanish fighting bull (*Bos taurus*) (Sánchez-Quintana, *et al.*) **184,** 273
Coracoclavicular joint, Incidence of the coracoclavicular joint in a South African sample (Nalla & Asvat) **184,** 439
Coronary and femoral arteries, Localisation of nitric oxide synthase and its colocalisation with vasoactive peptides in coronary and femoral arteries. An electron microscope study (Dikranian, *et al.*) **184,** 583
Coronary artery disease, Critical coronary artery disease and senile plaques (Soneira & Scott) **184,** 203, *dem*
Corpus callosum, Studies of the ultrastructure and permeability of the blood–brain barrier in the developing corpus callosum in postnatal rat brain using electron dense tracers (Xu & Ling) **184,** 227
Coturnix coturnix, Nitric oxide synthase neurons of the gastrointestinal tract of an avian species, *Coturnix coturnix* (Li, *et al.*) **184,** 261
CR3 receptors, Upregulation and induction of surface antigens with special reference to MHC class II expression in microglia in postnatal rat brain following intravenous or intraperitoneal injections of lipopolysaccharide (Xu & Ling) **184,** 285
Cranial capacity, Linear correlates of cranial capacity in *Cercopithecus aethiops* (von Mayer) **184,** 436
Cranial nerves, Morphological specialisations of rat cranial nerve transitional zones (Fraher & O'Leary) **184,** 119
Crocodilus niloticus, Zahnreihe and heterodonty in the Nile crocodile, *Crocodilus niloticus* (Kieser) **184,** 439
Culture, Colocalisation of NADPH-diaphorase with nitric oxide synthase and vasoactive intestinal polypeptide in newborn pancreatic neurons (Tay, *et al.*) **184,** 545
Cyclic guanosine monophosphate (cGMP), Distribution of heat-stable enterotoxin/guanylin receptors in the intestinal tract of man and other mammals (Krause, *et al.*) **184,** 407
Cynomolgus monkey, Trigeminal innervation of the scleral spur in cynomolgus monkeys (Ruskell) **184,** 511
Cytokeratins, Coexpression of different cytokeratins, vimentin and desmin in the rete testis and epididymis in the dog (Wakui, *et al.*) **184,** 147
Cytotrophoblast, Proliferative versus hypertrophic growth in tissue subcompartments of human placental villi during gestation (Mayhew, *et al.*) **184,** 535

Dark adaptation, Alterations in the intermediate layer of goldfish meninges during adaptation to darkness (Caruncho & Da Silva) **184,** 355
Deep inguinal ring, The relationship of the femoral lateral cutaneous nerve to the deep inguinal ring (Horner, *et al.*) **184,** 201, *dem*
Dendrites, The effect of age on dendrites in the rat superior cervical ganglion (Andrews, *et al.*) **184,** 111
Target specificity in the morphology and growth of dendritic arbors of sympathetic neurons during development and ageing (Andrews & Cowen) **184,** 186, *P*
Dendritic cells, Ia antigens are expressed on ATPase-positive dendritic cells in chicken epidermis (Torres & Aldaco) **184,** 591
Dental pulp, Changes in the subodontoblastic capillaries of human dental pulp with increasing age (Daly, *et al.*) **184,** 439
Desmin, Coexpression of different cytokeratins, vimentin and desmin in the rete testis and epididymis in the dog (Wakui, *et al.*) **184,** 147
Development, Hyperglycaemia and hyperketonaemia: their individual and combined teratogenic effects on rat embryonic growth and development (Travers, *et al.*) **184,** 193, *dem*
An atlas database of mouse development (Baldock, *et al.*) **184,** 193, *dem*
Quantitative ultrastructural characterisation of the mesenchyme within the developing maximillary processes of the rat (Symons & Moxham) **184,** 199, *dem*
Diabetes mellitus, Ultrastructural changes in the hypothalamic supraoptic nucleus of the streptozotocin-induced diabetic rat (Dheen, *et al.*) **184,** 615
Diaphragmatic hernia, Congenital diaphragmatic hernia in a cat (Louw) **184,** 438
Diazepam, The effect of diazepam on the development of *Gallus (*Vorster, *et al.*) **184,** 435
Diet, Morphology of intestinal villi in African antelope (Artiodactyla: Bovidae) (Woodall & Skinner) **184,** 519
Digestive tract, Nitric oxide synthase neurons of the gastrointestinal tract of an avian species, *Coturnix coturnix* (Li, *et al.*) **184,** 261
Disease, The joint capsule: structure, composition, ageing and disease (Ralphs & Benjamin) **184,** 503
Dissection, Comparison of a video and a lecture in students' preparation for human dissection (Evans, *et al.*) **184,** 192, *P*
Dog, Coexpression of different cytokeratins, vimentin and desmin in the rete testis and epididymis in the dog (Wakui, *et al.*) **184,** 147
Drosophila, The molecular anatomy of Hox gene expression (Coletta, *et al.*) **184,** 15
Duck, Ultrastructural changes in kidneys of ducks exposed to cadmium and lead in combination (Prasada Rao) **184,** 437
Duodenum, The effect of tiaprofenic acid on the mucosa of the stomach and duodenum of the albino rat (Boseila, *et al.*) **184,** 206, *dem*
Immunocytochemical localisation of ANP in the submandibular salivary gland and duodenum of the rat (Lourens, *et al.*) **184,** 435

EELS, Postpartum erythrophagocytosis, iron storage and iron secretion in the endometrium of the tree shrew (*Tupaia*) during pregnancy (Zeller & Kuhn) **184,** 597
Electron energy loss spectroscopy, Postpartum erythrophagocytosis, iron storage and iron secretion in the endometrium of the tree shrew (*Tupaia*) during pregnancy (Zeller & Kuhn) **184,** 597
Elephants, The histology of the intestinal tract of the African elephant (*Loxodonta africana*) (Kotzé) **184,** 440
Embryogenesis, An atlas database of mouse development (Baldock, *et al.*) **184,** 193, *dem*
Metabolic differentiation precedes vascular ingrowth into developing muscles in the embryonic chick forelimb (Orr & Wilson) **184,** 194, *dem*
A study of premature neural fold elevation in the early chick embryo (Westacott & England) **184,** 195, *dem*
A new structure of possible neural origin in the chick embryo (*Gallus domesticus*) (Gouda & England) **184,** 195, *dem*
A study of the normal development of the notochord in the chick embryo (Fegan) **184,** 195, *dem*
Effect of sodium valproate on neurulation in early chick embryos (Chia) **184,** 196, *dem*
Endometrium, Endometrial changes during pregnancy and after delivery in the rat (Boseila, *et al.*) **184,** 192, *dem*
Hyperstimulation affects glucosamine trisaccharides in the glycocalyx of the endometrium of the rat (Peverini & Kramer) **184,** 438
Postpartum erythrophagocytosis, iron storage and iron secretion in the endometrium of the tree shrew (*Tupaia*) during pregnancy (Zeller & Kuhn) **184,** 597
Endothelial cells, Embryonic avian endothelial cells, a new source of cells for in vitro angiogenesis research (Allen & Wilson) **184,** 194, *dem*
Endothelin-1, Localisation of nitric oxide synthase and its colocalisation with vasoactive peptides in coronary and femoral arteries. An electron microscope study (Dikranian, *et al.*) **184,** 583
Endothelium, Pharmacological actions of vasoactive substances contained in endothelial cells on human umbilical artery and vein (Sexton, *et al.*) **184,** 205, *dem*

Localisation of nitric oxide synthase and its colocalisation with vasoactive peptides in coronary and femoral arteries. An electron microscope study (Dikranian, *et al.*) **184,** 583

Endotoxin, Upregulation and induction of surface antigens with special reference to MHC class II expression in microglia in postnatal rat brain following intravenous or intraperitoneal injections of lipopolysaccharide (Xu & Ling) **184,** 285

Enteric nervous system, Structure of the enteric nervous system in the sheep omasum as revealed by neurofilament protein-like immunoreactivity (Yamamoto, *et al.*) **184,** 399

Enterocytes, Distribution of heat-stable enterotoxin/guanylin receptors in the intestinal tract of man and other mammals (Krause, *et al.*) **184,** 407

Ependyma, The ventricular system of the pigeon brain: a scanning electron microscope study (Mestres & Rascher) **184,** 35

Ependymin, Alterations in the intermediate layer of goldfish meninges during adaptation to darkness (Caruncho & Da Silva) **184,** 355

Epidermis, Ia antigens are expressed on ATPase-positive dendritic cells in chicken epidermis (Torres & Aldaco) **184,** 591

Epididymis, Coexpression of different cytokeratins, vimentin and desmin in the rete testis and epididymis in the dog (Wakui, *et al.*) **184,** 147

Erythrocytes, A hitherto unrecognised error in standard haematological values of the mean corpuscular volume (MCV) of normal erythrocytes (Mayhew, *et al.*) **184,** 188, *P*

Erythrophagocytosis, Postpartum erythrophagocytosis, iron storage and iron secretion in the endometrium of the tree shrew (*Tupaia*) during pregnancy (Zeller & Kuhn) **184,** 597

Ethanol, Morphometric analysis of the optic nerve in offspring of ethanol-treated female mice (Parson, *et al.*) **184,** 202, *dem*

Enteric nervous system, Nitric oxide synthase neurons of the gastrointestinal tract of an avian species, *Coturnix coturnix* (Li, *et al.*) **184,** 261

Exocytosis, The harderian gland and its excretory duct in the Wistar rat. A histological and ultrastructural study (Djeridane) **184,** 553

Extracellular matrix, Assembly of the tendon extracellular matrix during development (Birk & Zycband) **184,** 457

The joint capsule: structure, composition, ageing and disease (Ralphs & Benjamin) **184,** 503

Eye, Trigeminal innervation of the scleral spur in cynomolgus monkeys (Ruskell) **184,** 511

Eyelid development, An electron microscope study of eyelid development in the mouse (Findlater) **184,** 193, *dem*

Facial nerve, Why is the cervical branch of the facial nerve not enlarged in leprosy? (Crawford & Hobbs) **184,** 188, *P*

Facial recognition, Accuracy of recognition of 3-dimensional plastic reconstruction of faces from skulls (Jansen van Rensburg) **184,** 441

Fcγ receptors, Ontogeny and distribution of Fcγ receptors in the human placenta. Transport or immune surveillance? (Bright, *et al.*) **184,** 297

Feet, A functional anatomical comparison of plantar-flexion of the digits in the hind feet in three species: *Homo sapiens*, *Papio cynocephalus* and *Pan troglodytes* (Grieve) **184,** 440

Femoral head ligament, Innervation of the ligament of the femoral head in the Formosan rock monkey: a retrograde HRP tracing and ultrastructural study (Chien, *et al.*) **184,** 65

Ferritin, Postpartum erythrophagocytosis, iron storage and iron secretion in the endometrium of the tree shrew (*Tupaia*) during pregnancy (Zeller & Kuhn) **184,** 597

Fibre, Morphology of intestinal villi in African antelope (Artiodactyla: Bovidae) (Woodall & Skinner) **184,** 519

Fibre optic confocal imaging, Fibre optic confocal imaging (FOCI) for subsurface microscopy of the colon in vivo (Delaney, *et al.*) **184,** 157

Fibroblasts, Mutual attraction between emigrant cells from transected denervated nerve (Abernethy, *et al.*) **184,** 239

Assembly of the tendon extracellular matrix during development (Birk & Zycband) **184,** 457

Fibrocartilage, The joint capsule: structure, composition, ageing and disease (Ralphs & Benjamin) **184,** 503

Fibula, Influence of the fibula on growth of the rat tibia (Ali & Dickson) **184,** 347

Fish, Alterations in the intermediate layer of goldfish meninges during adaptation to darkness (Caruncho & Da Silva) **184,** 355

Fluorescent tracers, Motoneuron organisation of the muscles of the spinal accessory complex of the sheep investigated with the fluorescent retrograde tracer technique (Clavenzani, *et al.*) **184,** 381

Formosan rock monkey, Innervation of the ligament of the femoral head in the Formosan rock monkey: a retrograde HRP tracing and ultrastructural study (Chien, *et al.*) **184,** 65

Fornidex, The mandibular lingual foramen: a consistent arterial foramen in the middle of the mandible (McDonnell, *et al.*) **184,** 363

Freeze fracture, Alterations in the intermediate layer of goldfish meninges during adaptation to darkness (Caruncho & Da Silva) **184,** 355

Functional neuroimaging, Functional neuroanatomy of the human brain: positron emission tomography – a new neuroanatomical technique (Frackowiak & Friston) **184,** 211

GABAergic neurons, An axosomatic and axodendritic multipolar neuron in the lizard cerebral cortex (Bernabeu, *et al.*) **184,** 567

Gallus, The effect of diazepam on the development of *Gallus* (Vorster, *et al.*) **184,** 435

Gap junctions, Alterations in the intermediate layer of goldfish meninges during adaptation to darkness (Caruncho & Da Silva) **184,** 355

Glenohumeral ligament, The anatomy of the three glenohumeral ligaments and the subscapular recess of the shoulder joint (Duffy, *et al.*) **184,** 199, *dem*

Glial fibrillary acidic protein, Studies of the ultrastructure and permeability of the blood–brain barrier in the developing corpus callosum in postnatal rat brain using electron dense tracers (Xu & Ling) **184,** 227

Glucosamine trisaccharides, Hyperstimulation affects glucosamine trisaccharides in the glycocalyx of the endometrium of the rat (Peverini & Kramer) **184,** 438

Glycocalyx, Hyperstimulation affects glucosamine trisaccharides in the glycocalyx of the endometrium of the rat (Peverini & Kramer) **184,** 438

Glycoconjugate stability, Optimising glycoconjugate stability, intracellularly in developing joint intermediate layer, and extracellularly in interlacunar network of skeletal rudiment cartilage (Lawton, *et al.*) **184,** 196, *dem*

Glycosaminoglycans, Glycosaminoglycans within the periodontal connective tissues of the ovine incisor (Walker, *et al.*) **184,** 198, *dem*

The joint capsule: structure, composition, ageing and disease (Ralphs & Benjamin) **184,** 503

Gold immunolabelling, Quantitation of gold labelling and antigens in immunolabelled ultrathin sections (Lucocq) **184,** 1

Golgi, A Phaseolus lectin anterograde tracing study of the tectorotundal projections in the domestic chick (Ngo, *et al.*) **184,** 129

Golgi impregnation, An axosomatic and axodendritic multipolar neuron in the lizard cerebral cortex (Bernabeu, *et al.*) **184,** 567

Gonadotrophs, Secretory heterogeneity among gonadotrophs of normal and *hpg* mice (Durnin & Morris) **184,** 190, *P*

Granulated metrial gland cell, A scanning electron microscopy study of interactions between mouse granulated metrial gland cells and placental trophoblast cells in vitro (Stewart & Mukhtar) **184,** 153

Growth, Hyperglycaemia and hyperketonaemia: their individual and combined teratogenic effects on rat embryonic growth and development (Travers, *et al.*) **184,** 193, *dem*

Muscle at birth in mice selected for large and small body size (Brown & Stickland) **184,** 371
Proliferative versus hypertrophic growth in tissue subcompartments of human placental villi during gestation (Mayhew, *et al.*) **184,** 535
Guinea pig, Colocalisation of NADPH-diaphorase with nitric oxide synthase and vasoactive intestinal polypeptide in newborn pancreatic neurons (Tay, *et al.*) **184,** 545

Haemodynamics, Haemodynamic changes in the rat femur and tibia following femoral vein ligation (Revell & Brookes) **184,** 625
Hard palate, Anatomical variation in position of the greater palatine foramen in the adult human skull (Ajmani) **184,** 635
Harderian gland, The harderian gland and its excretory duct in the Wistar rat. A histological and ultrastructural study (Djeridane) **184,** 553
Heart, Spatial arrangement of the heart muscle fascicles and intramyocardial connective tissue in the Spanish fighting bull (*Bos taurus*) (Sánchez-Quintana, *et al.*) **184,** 273
Heart valves, Spatial arrangement of the heart muscle fascicles and intramyocardial connective tissue in the Spanish fighting bull (*Bos taurus*) (Sánchez-Quintana, *et al.*) **184,** 273
Heterodonty, Zahnreihe and heterodonty in the Nile crocodile, *Crocodilus niloticus* (Kieser) **184,** 439
Hippocampus, An axosomatic and axodendritic multipolar neuron in the lizard cerebral cortex (Bernabeu, *et al.*) **184,** 567
Histochemistry, Inability of muscles in the obese mouse (*ob/ob*) to respond to changes in body weight and activity (Stickland, *et al.*) **184,** 527
Hofbauer cells, Ontogeny and distribution of Fcγ receptors in the human placenta. Transport or immune surveillance? (Bright, *et al.*) **184,** 297
Hox genes, The molecular anatomy of Hox gene expression (Coletta, *et al.*) **184,** 15
***hpg* mice**, Secretory heterogeneity among gonadotrophs of normal and *hpg* mice (Durnin & Morris) **184,** 190, *P*
Humeroulnar joint, Quantitative assessment of the incongruity in the human humeroulnar joint using polyether casting (Eckstein, *et al.*) **184,** 196, *dem*
Hyaluronan, Cellular aspects of the development of diarthrodial joints and articular cartilage (Archer, *et al.*) **184,** 447
The nature and origins of synovium: experimental approaches to the study of synoviocyte differentiation (Edwards) **184,** 493
The chemical morphology of age-related changes in human intervertebral disc glycosaminoglycans from cervical, thoracic and lumbar nucleus pulposus and annulus fibrosus (Scott, *et al.*) **184,** 73
Hyperglycaemia, Hyperglycaemia and hyperketonaemia: their individual and combined teratogenic effects on rat embryonic growth and development (Travers, *et al.*) **184,** 193, *dem*
Hyperketonaemia, Hyperglycaemia and hyperketonaemia: their individual and combined teratogenic effects on rat embryonic growth and development (Travers, *et al.*) **184,** 193, *dem*
Hypothalamus, Methods used to investigate fetal anterior hypothalamic grafts in the CNS of the adult rat (Meal & Parker) **184,** 187, *P*
Ultrastructural changes in the hypothalamic supraoptic nucleus of the streptozotocin-induced diabetic rat (Dheen, *et al.*) **184,** 615

Ia antigens, Ia antigens are expressed on ATPase-positive dendritic cells in chicken epidermis (Torres & Aldaco) **184,** 591
Immunoglobulin G, Ontogeny and distribution of Fcγ receptors in the human placenta. Transport or immune surveillance? (Bright, *et al.*) **184,** 297
Impregnation, A Phaseolus lectin anterograde tracing study of the tectorotundal projections in the domestic chick (Ngo, *et al.*) **184,** 129
Indomethacin, Indomethacin-induced small intestinal damage in the mouse: a morphological profile (Ettarh, *et al.*) **184,** 191, *P*
Insulin-like growth factors, Cellular aspects of the development of diarthrodial joints and articular cartilage (Archer, *et al.*) **184,** 447
Intercellular junctions, Alterations in the intermediate layer of goldfish meninges during adaptation to darkness (Caruncho & Da Silva) **184,** 355
Intermediate filaments, Coexpression of different cytokeratins, vimentin and desmin in the rete testis and epididymis in the dog (Wakui, *et al.*) **184,** 147
Age-related changes in intermediate filament expression in the periodontium of rats (Webb, *et al.*) **184,** 198, *dem*
Internodal length, Dimensions of individual alpha and gamma motor fibres in the ventral funiculus of the cat spinal cord (Fabricius, *et al.*) **184,** 319
Interphalangeal joints, Kinematic magnetic resonance imaging of the interphalangeal joints of human fingers (Nolan, *et al.*) **184,** 197, *dem*
Pathological changes in the proximal interphalangeal joint of human fingers (Lewis, *et al.*) **184,** 197, *dem*
Intervertebral discs, Biomechanics of the intervertebral disc (Drost) **184,** 184, *P*
The chemical morphology of age-related changes in human intervertebral disc glycosaminoglycans from cervical, thoracic and lumbar nucleus pulposus and annulus fibrosus (Scott, *et al.*) **184,** 73
Intestinal tract, The histology of the intestinal tract of the African elephant (*Loxodonta africana*) (Kotzé) **184,** 440
Intestine, Indomethacin-induced small intestinal damage in the mouse: a morphological profile (Ettarh, *et al.*) **184,** 191, *P*
Morphology of intestinal villi in African antelope (Artiodactyla: Bovidae) (Woodall & Skinner) **184,** 519
Intestines, The correlation of radiation-induced morphological changes with the uptake of radiolabelled glucose in the rat small intestine (McCullough, *et al.*) **184,** 206, *dem*
The absorption of polystyrene microparticles across the intestine of Wistar rats (Jenkins, *et al.*) **184,** 206, *dem*
Stereological estimation of nuclear volumes in the normal human colorectal crypt epithelium (Morais, *et al.*) **184,** 207, *dem*
Iron, Postpartum erythrophagocytosis, iron storage and iron secretion in the endometrium of the tree shrew (*Tupaia*) during pregnancy (Zeller & Kuhn) **184,** 597
Isoprenaline, The enhancement of revascularisation of skeletal muscle transplants using the β_2-agonist isoprenaline (Roberts & McGeachie) **184,** 309

Joint capsule, The joint capsule: structure, composition, ageing and disease (Ralphs & Benjamin) **184,** 503
Joints, The development of diarthrodial joints and articular cartilage (Archer) **184,** 181, *P*
In vivo magnetic resonance imaging of the distal interphalangeal joint of human fingers (Hodgson, *et al.*) **184,** 182, *P*
Pathology of joints (Gardner) **184,** 182, *P*
The nature and origins of synovium (Edwards) **184,** 183, *P*
The joint capsule: structure, composition, ageing and disease (Ralphs & Benjamin) **184,** 183, *P*
Transfer of tensile stresses in joint regions: ligaments parallel or in series to muscular tissue (Mameren & Drukker) **184,** 184, *P*
The specialised craniovertebral joint of the sheep develops by modification of typical forms of atlas and axis (Lipetz & Presley) **184,** 184, *P*
Quantitative assessment of the incongruity in the human humeroulnar joint using polyether casting (Eckstein, *et al.*) **184,** 196, *dem*
Optimising glycoconjugate stability, intracellularly in developing joint intermediate layer, and extracellularly in interlacunar network of skeletal rudiment cartilage (Lawton, *et al.*) **184,** 196, *dem*
Adult articular cartilage in *Monodelphis domestica*: an immunocytochemical study (Morrison, *et al.*) **184,** 197, *dem*

Kinematic magnetic resonance imaging of the interphalangeal joints of human fingers (Nolan, *et al.*) **184,** 197, *dem*
Pathological changes in the proximal interphalangeal joint of human fingers (Lewis, *et al.*) **184,** 197, *dem*
The anatomy of the three glenohumeral ligaments and the subscapular recess of the shoulder joint (Duffy, *et al.*) **184,** 199, *dem*
A histological study of vascular canals in knee joint cartilages of young Chacma baboons (*Papio ursinus*) (Missankov) **184,** 437
Incidence of the coracoclavicular joint in a South African sample (Nalla & Asvat) **184,** 439
Cellular aspects of the development of diarthrodial joints and articular cartilage (Archer, *et al.*) **184,** 447
Problems and paradigms in joint pathology (Gardner) **184,** 465

Kabwe man, A modern counterpart to explain the left temporal bone lesion in Kabwe (Broken Hill) man (Slater & Kovacs) **184,** 436
Keratan sulphate, Cellular aspects of the development of diarthrodial joints and articular cartilage (Archer, *et al.*) **184,** 447
The chemical morphology of age-related changes in human intervertebral disc glycosaminoglycans from cervical, thoracic and lumbar nucleus pulposus and annulus fibrosus (Scott, *et al.*) **184,** 73
Kidney, Ultrastructural changes in kidneys of ducks exposed to cadmium and lead in combination (Prasada Rao) **184,** 437
Knee joint, A histological study of vascular canals in knee joint cartilages of young Chacma baboons (*Papio ursinus*) (Missankov) **184,** 437

Langerhans cells, Ia antigens are expressed on ATPase-positive dendritic cells in chicken epidermis (Torres & Aldaco) **184,** 591
Lanthanum, Studies of the ultrastructure and permeability of the blood–brain barrier in the developing corpus callosum in postnatal rat brain using electron dense tracers (Xu & Ling) **184,** 227
Lateral pterygoid muscle, The relationship between the temporomandibular joint capsule, articular disc and jaw muscles (Schmolke) **184,** 335
Latissimus dorsi, An unusually medial axillary arch muscle (Dharap) **184,** 639
Lead, Ultrastructural changes in kidneys of ducks exposed to cadmium and lead in combination (Prasada Rao) **184,** 437
Lectins, Development of the chick thymus microenvironment: a study by lectin histochemistry (Fernandez, *et al.*) **184,** 137
Leprosy, Why is the cervical branch of the facial nerve not enlarged in leprosy? (Crawford & Hobbs) **184,** 188, *P*
Ligaments, Innervation of the ligament of the femoral head in the Formosan rock monkey: a retrograde HRP tracing and ultrastructural study (Chien, *et al.*) **184,** 65
Transfer of tensile stresses in joint regions: ligaments parallel or in series to muscular tissue (Mameren & Drukker) **184,** 184, *P*
Limb distraction, Changes in muscle compliance following limb distraction in the New Zealand White rabbit (Williams, *et al.*) **184,** 189, *P*
Lingual nerve, Axon counts and sizes after lingual nerve injury and repair in cats (Andrade, *et al.*) **184,** 185, *P*
Lizards, An axosomatic and axodendritic multipolar neuron in the lizard cerebral cortex (Bernabeu, *et al.*) **184,** 567
Longus capitis, Case report: the cleidocervical muscle with speculation as to its origin (Tomo, *et al.*) **184,** 165
Longus colli, Case report: the cleidocervical muscle with speculation as to its origin (Tomo, *et al.*) **184,** 165
Loxodonta africana, The histology of the intestinal tract of the African elephant (*Loxodonta africana*) (Kotzé) **184,** 440
Lymphoid tissue, New applications for the zinc iodide–osmium tetroxide technique (Dağdeviren, *et al.*) **184,** 83

Macaca cyclopis, Innervation of the ligament of the femoral head in the Formosan rock monkey: a retrograde HRP tracing and ultrastructural study (Chien, *et al.*) **184,** 65
Macaca fascicularis, The ciliary ganglion of the monkey: a light and electron microscope study (Zhang, *et al.*) **184,** 251
Trigeminal innervation of the scleral spur in cynomolgus monkeys (Ruskell) **184,** 511
Macrophages, Postpartum erythrophagocytosis, iron storage and iron secretion in the endometrium of the tree shrew (*Tupaia*) during pregnancy (Zeller & Kuhn) **184,** 597
Magnetic resonance imaging, Kinematic magnetic resonance imaging of the interphalangeal joints of human fingers (Nolan, *et al.*) **184,** 197, *dem*
Major histocompatibility complex, Ia antigens are expressed on ATPase-positive dendritic cells in chicken epidermis (Torres & Aldaco) **184,** 591
Maldevelopment, The effect of diazepam on the development of *Gallus* (Vorster, *et al.*) **184,** 435
Congenital diaphragmatic hernia in a cat (Louw) **184,** 438
Mandible, Regional and temporal changes in the synthesis of matrix metalloproteinases and TIMP-1 during development of the rabbit mandibular condyle (Breckon, *et al.*) **184,** 99
Mandibular lingual foramen, The mandibular lingual foramen: a consistent arterial foramen in the middle of the mandible (McDonnell, *et al.*) **184,** 363
Marsupials, Cellular aspects of the development of diarthrodial joints and articular cartilage (Archer, *et al.*) **184,** 447
Masseter muscle, The relationship between the temporomandibular joint capsule, articular disc and jaw muscles (Schmolke) **184,** 335
Matrix metalloproteinases, Regional and temporal changes in the synthesis of matrix metalloproteinases and TIMP-1 during development of the rabbit mandibular condyle (Breckon, *et al.*) **184,** 99
Maxilla, Quantitative ultrastructural characterisation of the mesenchyme within the developing maximillary processes of the rat (Symons & Moxham) **184,** 199, *dem*
Mean corpuscular volume, A hitherto unrecognised error in standard haematological values of the mean corpuscular volume (MCV) of normal erythrocytes (Mayhew, *et al.*) **184,** 188, *P*
Medieval growth and mortality, Skeletal evidence for juvenile mortality and growth in a medieval town (1070–1534) (Harrison & Wakely) **184,** 204, *dem*
Membrane structure, Alterations in the intermediate layer of goldfish meninges during adaptation to darkness (Caruncho & Da Silva) **184,** 355
Alterations in the intermediate layer of goldfish meninges during adaptation to darkness (Caruncho & Da Silva) **184,** 355
Meninges, Alterations in the intermediate layer of goldfish meninges during adaptation to darkness (Caruncho & Da Silva) **184,** 355
Mesenchyme, Quantitative ultrastructural characterisation of the mesenchyme within the developing maximillary processes of the rat (Symons & Moxham) **184,** 199, *dem*
Mesentery, The involvement of peptidergic innervation in the response of the rat mesenteric arterial bed to acetylcholine (Scott, *et al.*) **184,** 202, *dem*
Metalloprotease, Articular cartilage and osteoarthrosis. The role of molecular markers to monitor breakdown, repair and disease (Lohmander) **184,** 477
Methylene blue, Large nerve cells with long axons in the granular layer and white matter of the murine cerebellum (Müller) **184,** 419
MHC antigens, Upregulation and induction of surface antigens with special reference to MHC class II expression in microglia in postnatal rat brain following intravenous or intraperitoneal injections of lipopolysaccharide (Xu & Ling) **184,** 285
Mice, Secretory heterogeneity among gonadotrophs of normal and *hpg* mice (Durnin & Morris) **184,** 190, *P*
Morphometric analysis of myelinated fibre composition in the optic nerve of adult C57BL and CBA strain mice and (C57BL × CBA)F1 hybrids: observations on interstrain variation (Dangata, *et al.*) **184,** 202, *dem*
Morphometric analysis of the optic nerve in offspring of ethanol-treated female mice (Parson, *et al.*) **184,** 202, *dem*

Muscle at birth in mice selected for large and small body size (Brown & Stickland) **184,** 371
Microglia, Upregulation and induction of surface antigens with special reference to MHC class II expression in microglia in postnatal rat brain following intravenous or intraperitoneal injections of lipopolysaccharide (Xu & Ling) **184,** 285
Molar cusps, The tuberculum sextum in the Vassekela, Barakwena and Hereros (Navsa) **184,** 439
Molar teeth, Anatomical variation in position of the greater palatine foramen in the adult human skull (Ajmani) **184,** 635
Monkey, The phrenic nerve in the rhesus monkey in the context of dorsoventral stratification within the cervicobrachial plexus (Akita, *et al.*) **184,** 187, *P*
The ciliary ganglion of the monkey: a light and electron microscope study (Zhang, *et al.*) **184,** 251
Linear correlates of cranial capacity in *Cercopithecus aethiops* (von Mayer) **184,** 436
Monodelphis domestica, Adult articular cartilage in *Monodelphis domestica*: an immunocytochemical study (Morrison, *et al.*) **184,** 197, *dem*
Cellular aspects of the development of diarthrodial joints and articular cartilage (Archer, *et al.*) **184,** 447
Mouse, The molecular anatomy of Hox gene expression (Coletta, *et al.*) **184,** 15
A scanning electron microscopy study of interactions between mouse granulated metrial gland cells and placental trophoblast cells in vitro (Stewart & Mukhtar) **184,** 153
Indomethacin-induced small intestinal damage in the mouse: a morphological profile (Ettarh, *et al.*) **184,** 191, *P*
An atlas database of mouse development (Baldock, *et al.*) **184,** 193, *dem*
An electron microscope study of eyelid development in the mouse (Findlater) **184,** 193, *dem*
The enhancement of revascularisation of skeletal muscle transplants using the β_2-agonist isoprenaline (Roberts & McGeachie) **184,** 309
Large nerve cells with long axons in the granular layer and white matter of the murine cerebellum (Müller) **184,** 419
Muscle, Avulsion stress fractures of the tibia – A cadaver study of the attachments of the deep plantar flexor muscles (Ekerman, *et al.*) **184,** 199, *dem*
Muscle at birth in mice selected for large and small body size (Brown & Stickland) **184,** 371
Motoneuron organisation of the muscles of the spinal accessory complex of the sheep investigated with the fluorescent retrograde tracer technique (Clavenzani, *et al.*) **184,** 381
Inability of muscles in the obese mouse (*ob/ob*) to respond to changes in body weight and activity (Stickland, *et al.*) **184,** 527
Muscle development, Metabolic differentiation precedes vascular ingrowth into developing muscles in the embryonic chick forelimb (Orr & Wilson) **184,** 194, *dem*
Myelin, Dimensions of individual alpha and gamma motor fibres in the ventral funiculus of the cat spinal cord (Fabricius, *et al.*) **184,** 319
Morphometric analysis of axons myelinated during adult life in the mouse superior cervical ganglion (Little & Heath) **184,** 387
Myenteric plexus, Structure of the enteric nervous system in the sheep omasum as revealed by neurofilament protein-like immunoreactivity (Yamamoto, *et al.*) **184,** 399

NADPH-diaphorase, Nitric oxide synthase neurons of the gastrointestinal tract of an avian species, *Coturnix coturnix* (Li, *et al.*) **184,** 261
Colocalisation of NADPH-diaphorase with nitric oxide synthase and vasoactive intestinal polypeptide in newborn pancreatic neurons (Tay, *et al.*) **184,** 545
Neck muscles, Motoneuron organisation of the muscles of the spinal accessory complex of the sheep investigated with the fluorescent retrograde tracer technique (Clavenzani, *et al.*) **184,** 381
Nerve growth factor, The use of in oculo transplants to study the regulation of age changes in sympathetic perivascular nerves and their responses to nerve growth factor (Thrasivoulou & Cowen) **184,** 185, *P*
Nerve injury, Axon counts and sizes after lingual nerve injury and repair in cats (Andrade, *et al.*) **184,** 185, *P*
Nerve transection, Mutual attraction between emigrant cells from transected denervated nerve (Abernethy, *et al.*) **184,** 239
Neural fold, A study of premature neural fold elevation in the early chick embryo (Westacott & England) **184,** 195, *dem*
Neurodegeneration, Ultrastructural changes in the hypothalamic supraoptic nucleus of the streptozotocin-induced diabetic rat (Dheen, *et al.*) **184,** 615
Neurofilament immunoreactivity, Structure of the enteric nervous system in the sheep omasum as revealed by neurofilament protein-like immunoreactivity (Yamamoto, *et al.*) **184,** 399
Neurofilament protein, Structure of the enteric nervous system in the sheep omasum as revealed by neurofilament protein-like immunoreactivity (Yamamoto, *et al.*) **184,** 399
Neuron culture, Colocalisation of NADPH-diaphorase with nitric oxide synthase and vasoactive intestinal polypeptide in newborn pancreatic neurons (Tay, *et al.*) **184,** 545
Neuronal connectivity, The effects of undernutrition on connectivity in the cerebellar cortex of adult rats (Yucel, *et al.*) **184,** 59
Neurons, Fractionator estimates of Purkinje cell complements in mammalian cerebella (Mwamengele, *et al.*) **184,** 188, *P*
Quantitative enzyme histochemical studies on autonomic neurons supplying the urinary tract in young adult and aged rats (Warburton & Santer) **184,** 200, *dem*
Motoneuron organisation of the muscles of the spinal accessory complex of the sheep investigated with the fluorescent retrograde tracer technique (Clavenzani, *et al.*) **184,** 381
Large nerve cells with long axons in the granular layer and white matter of the murine cerebellum (Müller) **184,** 419
Colocalisation of NADPH-diaphorase with nitric oxide synthase and vasoactive intestinal polypeptide in newborn pancreatic neurons (Tay, *et al.*) **184,** 545
Neurotropism, Mutual attraction between emigrant cells from transected denervated nerve (Abernethy, *et al.*) **184,** 239
Neurulation, Effect of sodium valproate on neurulation in early chick embryos (Chia) **184,** 196, *dem*
Nitric oxide synthase, Nitric oxide synthase neurons of the gastrointestinal tract of an avian species, *Coturnix coturnix* (Li, *et al.*) **184,** 261
Colocalisation of NADPH-diaphorase with nitric oxide synthase and vasoactive intestinal polypeptide in newborn pancreatic neurons (Tay, *et al.*) **184,** 545
Localisation of nitric oxide synthase and its colocalisation with vasoactive peptides in coronary and femoral arteries. An electron microscope study (Dikranian, *et al.*) **184,** 583
Nodes of Ranvier, Dimensions of individual alpha and gamma motor fibres in the ventral funiculus of the cat spinal cord (Fabricius, *et al.*) **184,** 319
Nose, Acoustic rhinometry and the estimation of nasal cavity volume: validation by Cavalieri sectioning (O'Flynn & Mayhew) **184,** 189, *P*
Notochord, A study of the normal development of the notochord in the chick embryo (Fegan) **184,** 195, *dem*
Nucleus pulposus, The chemical morphology of age-related changes in human intervertebral disc glycosaminoglycans from cervical, thoracic and lumbar nucleus pulposus and annulus fibrosus (Scott, *et al.*) **184,** 73
Nucleus rotundus, A Phaseolus lectin anterograde tracing study of the tectorotundal projections in the domestic chick (Ngo, *et al.*) **184,** 129

Obese mouse, Inability of muscles in the obese mouse (*ob/ob*) to respond to changes in body weight and activity (Stickland, *et al.*) **184,** 527
Omasum, Structure of the enteric nervous system in the sheep omasum as revealed by neurofilament protein-like immunoreactivity (Yamamoto, *et al.*) **184,** 399
Ophthalmic nerve, Trigeminal innervation of the scleral spur in cynomolgus monkeys (Ruskell) **184,** 511
Optic nerve, Morphometric analysis of myelinated fibre

composition in the optic nerve of adult C57BL and CBA strain mice and (C57BL × CBA)F1 hybrids: observations on interstrain variation (Dangata, *et al.*) **184,** 202, *dem*
Morphometric analysis of the optic nerve in offspring of ethanol-treated female mice (Parson, *et al.*) **184,** 202, *dem*
Optic tectum, A Phaseolus lectin anterograde tracing study of the tectorotundal projections in the domestic chick (Ngo, *et al.*) **184,** 129
Osmotic stress, Ultrastructural changes in the hypothalamic supraoptic nucleus of the streptozotocin-induced diabetic rat (Dheen, *et al.*) **184,** 615
Osteoarthrosis, Problems and paradigms in joint pathology (Gardner) **184,** 465
Articular cartilage and osteoarthrosis. The role of molecular markers to monitor breakdown, repair and disease (Lohmander) **184,** 477

Pan troglodytes, A functional anatomical comparison of plantar-flexion of the digits in the hind feet in three species: *Homo sapiens*, *Papio cynocephalus* and *Pan troglodytes* (Grieve) **184,** 440
Pancreas, New applications for the zinc iodide–osmium tetroxide technique (Dağdeviren, *et al.*) **184,** 83
Papio cynocephalus, A functional anatomical comparison of plantar-flexion of the digits in the hind feet in three species: *Homo sapiens*, *Papio cynocephalus* and *Pan troglodytes* (Grieve) **184,** 440
Papio ursinus, A note on the ascending aortic fold in the Chacma baboon, *Papio ursinus* (Lebona) **184,** 436
A histological study of vascular canals in knee joint cartilages of young Chacma baboons (*Papio ursinus*) (Missankov) **184,** 437
Paranasal sinuses, Interactive anatomy of the anterior skullbase, the orbit and the paranasal sinuses (Hillen, *et al.*) **184,** 207, *dem*
Paratenial, Neural connections of the suprachiasmatic nucleus and medial hypothalamus of the Syrian hamster (*Mesocricetus auratus*) (Orpen & Steiner) **184,** 23
Paraventricular hypothalamus, Neural connections of the suprachiasmatic nucleus and medial hypothalamus of the Syrian hamster (*Mesocricetus auratus*) (Orpen & Steiner) **184,** 23
Paraventricular thalamus, Neural connections of the suprachiasmatic nucleus and medial hypothalamus of the Syrian hamster (*Mesocricetus auratus*) (Orpen & Steiner) **184,** 23
Parvalbumin, An axosomatic and axodendritic multipolar neuron in the lizard cerebral cortex (Bernabeu, *et al.*) **184,** 567
Patella, Quantitative morphology of the subchondral bone plate and the overlying articular cartilage in normal human patellae (Milz, *et al.*) **184,** 184, *P*
Peptidergic innervation, The involvement of peptidergic innervation in the response of the rat mesenteric arterial bed to acetylcholine (Scott, *et al.*) **184,** 202, *dem*
Peptides, Localisation of nitric oxide synthase and its colocalisation with vasoactive peptides in coronary and femoral arteries. An electron microscope study (Dikranian, *et al.*) **184,** 583
Periodontium, The effects of ageing on the fibroblasts of the connective tissues comprising the rat periodontal ligament (Evans & Moxham) **184,** 198, *dem*
Glycosaminoglycans within the periodontal connective tissues of the ovine incisor (Walker, *et al.*) **184,** 198, *dem*
Age-related changes in intermediate filament expression in the periodontium of rats (Webb, *et al.*) **184,** 198, *dem*
Periosteum, Influence of the fibula on growth of the rat tibia (Ali & Dickson) **184,** 347
Structural aspects of the reversal phase of alveolar bone remodelling (Kang, *et al.*) **184,** 607
Peripheral nerve, Why is the cervical branch of the facial nerve not enlarged in leprosy? (Crawford & Hobbs) **184,** 188, *P*
Regional variations in the connective tissues of human peripheral nerves (Clatworthy, *et al.*) **184,** 200, *dem*
Myelinated and ummyelinated axon numbers in the vagus nerve trunks of young and aged rats (Soltanpour & Santer) **184,** 201, *dem*
Peripheral nerve; Lateral femoral cutaneous nerve, The relationship of the femoral lateral cutaneous nerve to the deep inguinal ring (Horner, *et al.*) **184,** 201, *dem*
Peripheral nervous system, Morphological changes in the rat peripheral nervous system following chronic exposure to dietary aluminium (Davies, *et al.*) **184,** 200, *dem*
Perivascular nerves, Human perivascular nerves at the base of the brain (Bleys, *et al.*) **184,** 203, *dem*
Phaseolus lectin, A Phaseolus lectin anterograde tracing study of the tectorotundal projections in the domestic chick (Ngo, *et al.*) **184,** 129
Pheromones, The harderian gland and its excretory duct in the Wistar rat. A histological and ultrastructural study (Djeridane) **184,** 553
Photography, The ringflash in biomedical photography (Hope) **184,** 440
Phrenic nerve, The phrenic nerve in the rhesus monkey in the context of dorsoventral stratification within the cervicobrachial plexus (Akita, *et al.*) **184,** 187, *P*
Pig, A preliminary ultrastructural study of radiation-induced lesions in the pig spinal cord (O'Reilly, *et al.*) **184,** 201, *dem*
Pigeons, The ventricular system of the pigeon brain: a scanning electron microscope study (Mestres & Rascher) **184,** 35
Pineal gland, Skeletal muscle in the pineal gland of the bat, *Rhinopoma microphyllum*: an ultrastructural investigation (Bhatnagar) **184,** 171
Labelling of neurons in the rat superior cervical ganglion after injection of wheat-germ agglutinin–horseradish peroxidase into the contralateral ganglion: evidence of transneuronal labelling (Atasever, *et al.*) **184,** 93
Placenta, A scanning electron microscopy study of interactions between mouse granulated metrial gland cells and placental trophoblast cells in vitro (Stewart & Mukhtar) **184,** 153
Ontogeny and distribution of Fcγ receptors in the human placenta. Transport or immune surveillance? (Bright, *et al.*) **184,** 297
Proliferative versus hypertrophic growth in tissue subcompartments of human placental villi during gestation (Mayhew, *et al.*) **184,** 535
Placental lactogen, Placental lactogen binding sites in the pregnant rabbit choroid plexus (Mangurian, *et al.*) **184,** 425
Plasmalemmal vesicles, Alterations in the intermediate layer of goldfish meninges during adaptation to darkness (Caruncho & Da Silva) **184,** 355
Polystyrene microparticles, The absorption of polystyrene microparticles across the intestine of Wistar rats (Jenkins, *et al.*) **184,** 206, *dem*
Positron emission tomography, Functional neuroanatomy of the human brain: positron emission tomography – a new neuroanatomical technique (Frackowiak & Friston) **184,** 211
Pregnancy, Endometrial changes during pregnancy and after delivery in the rat (Boseila, *et al.*) **184,** 192, *dem*
Prophyrin pigment, The harderian gland and its excretory duct in the Wistar rat. A histological and ultrastructural study (Djeridane) **184,** 553
Protein gene product 9.5, Are tumour blood vessels innervated? An immunohistochemical study utilising the neuronal marker protein gene product 9.5 (Mitchell, *et al.*) **184,** 187, *P*
Proteoglycan, Articular cartilage and osteoarthrosis. The role of molecular markers to monitor breakdown, repair and disease (Lohmander) **184,** 477
Purkinje cells, Fractionator estimates of Purkinje cell complements in mammalian cerebella (Mwamengele, *et al.*) **184,** 188, *P*
Large nerve cells with long axons in the granular layer and white matter of the murine cerebellum (Müller) **184,** 419

Q strain mice, Muscle at birth in mice selected for large and small body size (Brown & Stickland) **184,** 371
Quail, Morphology and catecholamine content of the adult quail adrenal gland (Parker & Parker) **184,** 190, *P*

Nitric oxide synthase neurons of the gastrointestinal tract of an avian species, *Coturnix coturnix* (Li, *et al.*) **184,** 261

Rabbit, The innervation of the pulp in rabbit teeth (Bishop) **184,** 185, *P*
Muscle length and fibre type in the rabbit latissimus dorsi subjected to stretch and stimulation (Gillott, *et al.*) **184,** 189, *P*
Changes in muscle compliance following limb distraction in the New Zealand White rabbit (Williams, *et al.*) **184,** 189, *P*
Placental lactogen binding sites in the pregnant rabbit choroid plexus (Mangurian, *et al.*) **184,** 425
Regional and temporal changes in the synthesis of matrix metalloproteinases and TIMP-1 during development of the rabbit mandibular condyle (Breckon, *et al.*) **184,** 99
Radiation injury, A preliminary ultrastructural study of radiation-induced lesions in the pig spinal cord (O'Reilly, *et al.*) **184,** 201, *dem*
The correlation of radiation-induced morphological changes with the uptake of radiolabelled glucose in the rat small intestine (McCullough, *et al.*) **184,** 206, *dem*
Rat, Fibre optic confocal imaging (FOCI) for subsurface microscopy of the colon in vivo (Delaney, *et al.*) **184,** 157
Asynchronous expression of catecholaminergic synthetic enzymes in rat brainstem neurons during prenatal maturation (Heap & Foster) **184,** 186, *P*
Methods used to investigate fetal anterior hypothalamic grafts in the CNS of the adult rat (Meal & Parker) **184,** 187, *P*
Neutralisation of endothelial anionic surface charge leads to a breakdown of the blood–nerve barrier in the rat (Ghabriel, *et al.*) **184,** 191, *P*
Tissue deficiency during drug-induced cleft palate formation in the rat (Singh, *et al.*) **184,** 192, *dem*
Endometrial changes during pregnancy and after delivery in the rat (Boseila, *et al.*) **184,** 192, *dem*
Hyperglycaemia and hyperketonaemia: their individual and combined teratogenic effects on rat embryonic growth and development (Travers, *et al.*) **184,** 193, *dem*
The effects of ageing on the fibroblasts of the connective tissues comprising the rat periodontal ligament (Evans & Moxham) **184,** 198, *dem*
Quantitative ultrastructural characterisation of the mesenchyme within the developing maximillary processes of the rat (Symons & Moxham) **184,** 199, *dem*
Quantitative enzyme histochemical studies on autonomic neurons supplying the urinary tract in young adult and aged rats (Warburton & Santer) **184,** 200, *dem*
Morphological changes in the rat peripheral nervous system following chronic exposure to dietary aluminium (Davies, *et al.*) **184,** 200, *dem*
Myelinated and ummyelinated axon numbers in the vagus nerve trunks of young and aged rats (Soltanpour & Santer) **184,** 201, *dem*
The involvement of peptidergic innervation in the response of the rat mesenteric arterial bed to acetylcholine (Scott, *et al.*) **184,** 202, *dem*
The correlation of radiation-induced morphological changes with the uptake of radiolabelled glucose in the rat small intestine (McCullough, *et al.*) **184,** 206, *dem*
The effect of tiaprofenic acid on the mucosa of the stomach and duodenum of the albino rat (Boseila, *et al.*) **184,** 206, *dem*
The absorption of polystyrene microparticles across the intestine of Wistar rats (Jenkins, *et al.*) **184,** 206, *dem*
Upregulation and induction of surface antigens with special reference to MHC class II expression in microglia in postnatal rat brain following intravenous or intraperitoneal injections of lipopolysaccharide (Xu & Ling) **184,** 285
Influence of the fibula on growth of the rat tibia (Ali & Dickson) **184,** 347
Preliminary study on biochemical changes following distension of the detrusor muscle in the rat (Greyling, *et al.*) **184,** 435
Immunocytochemical localisation of ANP in the submandibular salivary gland and duodenum of the rat (Lourens, *et al.*) **184,** 435
Hyperstimulation affects glucosamine trisaccharides in the glycocalyx of the endometrium of the rat (Peverini & Kramer) **184,** 438
Localisation of nitric oxide synthase and its colocalisation with vasoactive peptides in coronary and femoral arteries. An electron microscope study (Dikranian, *et al.*) **184,** 583
The effects of undernutrition on connectivity in the cerebellar cortex of adult rats (Yucel, *et al.*) **184,** 59
Structural aspects of the reversal phase of alveolar bone remodelling (Kang, *et al.*) **184,** 607
Ultrastructural changes in the hypothalamic supraoptic nucleus of the streptozotocin-induced diabetic rat (Dheen, *et al.*) **184,** 615
Labelling of neurons in the rat superior cervical ganglion after injection of wheat-germ agglutinin–horseradish peroxidase into the contralateral ganglion: evidence of transneuronal labelling (Atasever, *et al.*) **184,** 93
Rate testis, Coexpression of different cytokeratins, vimentin and desmin in the rete testis and epididymis in the dog (Wakui, *et al.*) **184,** 147
Rats, Age-related changes in intermediate filament expression in the periodontium of rats (Webb, *et al.*) **184,** 198, *dem*
Recurrent laryngeal nerves, Atypical branches of the aortic arch and atypical course of the recurrent laryngeal nerves (Khaledpour & Krahn) **184,** 645
Regeneration, The enhancement of revascularisation of skeletal muscle transplants using the β_2-agonist isoprenaline (Roberts & McGeachie) **184,** 309
Regional cerebral blood flow, Functional neuroanatomy of the human brain: positron emission tomography – a new neuroanatomical technique (Frackowiak & Friston) **184,** 211
Reptiles, Zahnreihe and heterodonty in the Nile crocodile, *Crocodilus niloticus* (Kieser) **184,** 439
An axosomatic and axodendritic multipolar neuron in the lizard cerebral cortex (Bernabeu, *et al.*) **184,** 567
Retroartikuläres Polster, The relationship between the temporomandibular joint capsule, articular disc and jaw muscles (Schmolke) **184,** 335
Revascularisation, The enhancement of revascularisation of skeletal muscle transplants using the β_2-agonist isoprenaline (Roberts & McGeachie) **184,** 309
Reversal line, Structural aspects of the reversal phase of alveolar bone remodelling (Kang, *et al.*) **184,** 607
Rheumatoid athritis, Problems and paradigms in joint pathology (Gardner) **184,** 465
Rhinopoma microphyllum, Skeletal muscle in the pineal gland of the bat, *Rhinopoma microphyllum*: an ultrastructural investigation (Bhatnagar) **184,** 171
Ringflash, The ringflash in biomedical photography (Hope) **184,** 440
Rootlet sheaths, Morphological specialisations of rat cranial nerve transitional zones (Fraher & O'Leary) **184,** 119
Ruminant stomach, Structure of the enteric nervous system in the sheep omasum as revealed by neurofilament protein-like immunoreactivity (Yamamoto, *et al.*) **184,** 399

Salivary gland, Immunocytochemical localisation of ANP in the submandibular salivary gland and duodenum of the rat (Lourens, *et al.*) **184,** 435
New applications for the zinc iodide–osmium tetroxide technique (Dağdeviren, *et al.*) **184,** 83
Scalenus anterior, Case report: the cleidocervical muscle with speculation as to its origin (Tomo, *et al.*) **184,** 165
Schwann cells, Mutual attraction between emigrant cells from transected denervated nerve (Abernethy, *et al.*) **184,** 239
Scleral spur, Trigeminal innervation of the scleral spur in cynomolgus monkeys (Ruskell) **184,** 511
Senile plaques, Critical coronary artery disease and senile plaques (Soneira & Scott) **184,** 203, *dem*
Sheep, The specialised craniovertebral joint of the sheep develops by modification of typical forms of atlas and axis (Lipetz & Presley) **184,** 184, *P*

Glycosaminoglycans within the periodontal connective tissues of the ovine incisor (Walker, *et al.*) **184,** 198, *dem*
Motoneuron organisation of the muscles of the spinal accessory complex of the sheep investigated with the fluorescent retrograde tracer technique (Clavenzani, *et al.*) **184,** 381
Structure of the enteric nervous system in the sheep omasum as revealed by neurofilament protein-like immunoreactivity (Yamamoto, *et al.*) **184,** 399
Shoulder joint, The anatomy of the three glenohumeral ligaments and the subscapular recess of the shoulder joint (Duffy, *et al.*) **184,** 199, *dem*
Skeletal growth, Inability of muscles in the obese mouse (*ob*/*ob*) to respond to changes in body weight and activity (Stickland, *et al.*) **184,** 527
Skeletal muscle, Skeletal muscle in the pineal gland of the bat, *Rhinopoma microphyllum*: an ultrastructural investigation (Bhatnagar) **184,** 171
Muscle length and fibre type in the rabbit latissimus dorsi subjected to stretch and stimulation (Gillott, *et al.*) **184,** 189, *P*
Changes in muscle compliance following limb distraction in the New Zealand White rabbit (Williams, *et al.*) **184,** 189, *P*
The enhancement of revascularisation of skeletal muscle transplants using the β_2-agonist isoprenaline (Roberts & McGeachie) **184,** 309
An unusually medial axillary arch muscle (Dharap) **184,** 639
Anomalous insertion of abductor pollicus longus: case report (Çelik, *et al.*) **184,** 643
New applications for the zinc iodide–osmium tetroxide technique (Dağdeviren, *et al.*) **184,** 83
Skull, Interactive anatomy of the anterior skullbase, the orbit and the paranasal sinuses (Hillen, *et al.*) **184,** 207, *dem*
A modern counterpart to explain the left temporal bone lesion in Kabwe (Broken Hill) man (Slater & Kovacs) **184,** 436
Accuracy of recognition of 3-dimensional plastic reconstruction of faces from skulls (Jansen van Rensburg) **184,** 441
Small intestine, Distribution of heat-stable enterotoxin/guanylin receptors in the intestinal tract of man and other mammals (Krause, *et al.*) **184,** 407
South American opossum, Cellular aspects of the development of diarthrodial joints and articular cartilage (Archer, *et al.*) **184,** 447
Spanish fighting bull, Spatial arrangement of the heart muscle fascicles and intramyocardial connective tissue in the Spanish fighting bull (*Bos taurus*) (Sánchez-Quintana, *et al.*) **184,** 273
Spinal accessory motoneurons, Motoneuron organisation of the muscles of the spinal accessory complex of the sheep investigated with the fluorescent retrograde tracer technique (Clavenzani, *et al.*) **184,** 381
Spinal cord, A preliminary ultrastructural study of radiation-induced lesions in the pig spinal cord (O'Reilly, *et al.*) **184,** 201, *dem*
Stereology, Quantitation of gold labelling and antigens in immunolabelled ultrathin sections (Lucocq) **184,** 1
Proliferative versus hypertrophic growth in tissue subcompartments of human placental villi during gestation (Mayhew, *et al.*) **184,** 535
Stomach, The effect of tiaprofenic acid on the mucosa of the stomach and duodenum of the albino rat (Boseila, *et al.*) **184,** 206, *dem*
Streptozotocin, Ultrastructural changes in the hypothalamic supraoptic nucleus of the streptozotocin-induced diabetic rat (Dheen, *et al.*) **184,** 615
Stress, A comparison of levels of stress and arousal and causes of stress in first-year medical and science students at Cardiff (Fitzgibbon & Evans) **184,** 204, *dem*
Stress fractures, Avulsion stress fractures of the tibia – A cadaver study of the attachments of the deep plantar flexor muscles (Ekerman, *et al.*) **184,** 199, *dem*
Structure, The joint capsule: structure, composition, ageing and disease (Ralphs & Benjamin) **184,** 503
Subchondrial bone, Quantitative morphology of the subchondral bone plate and the overlying articular cartilage in normal human patellae (Milz, *et al.*) **184,** 184, *P*
Submandibular gland, Immunocytochemical localisation of ANP in the submandibular salivary gland and duodenum of the rat (Lourens, *et al.*) **184,** 435
Subodontoblastic capillaries, Changes in the subodontoblastic capillaries of human dental pulp with increasing age (Daly, *et al.*) **184,** 439
Subparaventricular, Neural connections of the suprachiasmatic nucleus and medial hypothalamus of the Syrian hamster (*Mesocricetus auratus*) (Orpen & Steiner) **184,** 23
Substance P, Localisation of nitric oxide synthase and its colocalisation with vasoactive peptides in coronary and femoral arteries. An electron microscope study (Dikranian, *et al.*) **184,** 583
Superior cervical rat ganglion, Labelling of neurons in the rat superior cervical ganglion after injection of wheat-germ agglutinin–horseradish peroxidase into the contralateral ganglion: evidence of transneuronal labelling (Atasever, *et al.*) **184,** 93
Supraoptic nucleus, Ultrastructural changes in the hypothalamic supraoptic nucleus of the streptozotocin-induced diabetic rat (Dheen, *et al.*) **184,** 615
Sympathetic nerve, Morphometric analysis of axons myelinated during adult life in the mouse superior cervical ganglion (Little & Heath) **184,** 387
Sympathetic nerves, The use of in oculo transplants to study the regulation of age changes in sympathetic perivascular nerves and their responses to nerve growth factor (Thrasivoulou & Cowen) **184,** 185, *P*
Sympathetic neurons, The effect of age on dendrites in the rat superior cervical ganglion (Andrews, *et al.*) **184,** 111
Target specificity in the morphology and growth of dendritic arbors of sympathetic neurons during development and ageing (Andrews & Cowen) **184,** 186, *P*
Syncytiotrophoblast, Ontogeny and distribution of Fcγ receptors in the human placenta. Transport or immune surveillance? (Bright, *et al.*) **184,** 297
Proliferative versus hypertrophic growth in tissue subcompartments of human placental villi during gestation (Mayhew, *et al.*) **184,** 535
Synoviocyte, The nature and origins of synovium: experimental approaches to the study of synoviocyte differentiation (Edwards) **184,** 493
Synovium, The nature and origins of synovium (Edwards) **184,** 183, *P*
The nature and origins of synovium: experimental approaches to the study of synoviocyte differentiation (Edwards) **184,** 493
The joint capsule: structure, composition, ageing and disease (Ralphs & Benjamin) **184,** 503

Tectorotundal projections, A Phaseolus lectin anterograde tracing study of the tectorotundal projections in the domestic chick (Ngo, *et al.*) **184,** 129
Teeth, The innervation of the pulp in rabbit teeth (Bishop) **184,** 185, *P*
Age-related changes in intermediate filament expression in the periodontium of rats (Webb, *et al.*) **184,** 198, *dem*
Glycosaminoglycans within the periodontal connective tissues of the ovine incisor (Walker, *et al.*) **184,** 198, *dem*
The effects of ageing on the fibroblasts of the connective tissues comprising the rat periodontal ligament (Evans & Moxham) **184,** 198, *dem*
Pattern differences in tooth development in chimpanzees and humans (Kuykendall) **184,** 438
The tuberculum sextum in the Vassekela, Barakwena and Hereros (Navsa) **184,** 439
Zahnreihe and heterodonty in the Nile crocodile, *Crocodilus niloticus* (Kieser) **184,** 439
Changes in the subodontoblastic capillaries of human dental pulp with increasing age (Daly, *et al.*) **184,** 439
Teleosts, Alterations in the intermediate layer of goldfish meninges during adaptation to darkness (Caruncho & Da Silva) **184,** 355

Temporalis muscle, The relationship between the temporomandibular joint capsule, articular disc and jaw muscles (Schmolke) **184,** 335
Temporomandibular joint, The relationship between the temporomandibular joint capsule, articular disc and jaw muscles (Schmolke) **184,** 335
Tendon, Assembly of the tendon extracellular matrix during development (Birk & Zycband) **184,** 457
Tendons, Qualitative and quantitative analysis of the conjoint tendon (Leow, *et al.*) **184,** 199, *dem*
Tension receptors, Trigeminal innervation of the scleral spur in cynomolgus monkeys (Ruskell) **184,** 511
Teratogenesis, Hyperglycaemia and hyperketonaemia: their individual and combined teratogenic effects on rat embryonic growth and development (Travers, *et al.*) **184,** 193, *dem*
Testis, Coexpression of different cytokeratins, vimentin and desmin in the rete testis and epididymis in the dog (Wakui, *et al.*) **184,** 147
Thymus, Development of the chick thymus microenvironment: a study by lectin histochemistry (Fernandez, *et al.*) **184,** 137
Thymus microenvironment, Development of the chick thymus microenvironment: a study by lectin histochemistry (Fernandez, *et al.*) **184,** 137
Tiaprofenic acid, The effect of tiaprofenic acid on the mucosa of the stomach and duodenum of the albino rat (Boseila, *et al.*) **184,** 206, *dem*
Tibia, Avulsion stress fractures of the tibia – A cadaver study of the attachments of the deep plantar flexor muscles (Ekerman, *et al.*) **184,** 199, *dem*
Influence of the fibula on growth of the rat tibia (Ali & Dickson) **184,** 347
Tight junctions, Alterations in the intermediate layer of goldfish meninges during adaptation to darkness (Caruncho & Da Silva) **184,** 355
TIMP, Regional and temporal changes in the synthesis of matrix metalloproteinases and TIMP-1 during development of the rabbit mandibular condyle (Breckon, *et al.*) **184,** 99
Trabecular meshwork, Trigeminal innervation of the scleral spur in cynomolgus monkeys (Ruskell) **184,** 511
Transitional zone, Morphological specialisations of rat cranial nerve transitional zones (Fraher & O'Leary) **184,** 119
Transneuronal labelling, Labelling of neurons in the rat superior cervical ganglion after injection of wheat-germ agglutinin–horseradish peroxidase into the contralateral ganglion: evidence of transneuronal labelling (Atasever, *et al.*) **184,** 93
Transplantation, The enhancement of revascularisation of skeletal muscle transplants using the β_2-agonist isoprenaline (Roberts & McGeachie) **184,** 309
Trigeminal nerve, Trigeminal innervation of the scleral spur in cynomolgus monkeys (Ruskell) **184,** 511
Trophoblast, A scanning electron microscopy study of interactions between mouse granulated metrial gland cells and placental trophoblast cells in vitro (Stewart & Mukhtar) **184,** 153
Ontogeny and distribution of Fcγ receptors in the human placenta. Transport or immune surveillance? (Bright, *et al.*) **184,** 297
Tuberculum sextum, The tuberculum sextum in the Vassekela, Barakwena and Hereros (Navsa) **184,** 439

Umbilical vessels, Pharmacological actions of vasoactive substances contained in endothelial cells on human umbilical artery and vein (Sexton, *et al.*) **184,** 205, *dem*
Undernutrition, The effects of undernutrition on connectivity in the cerebellar cortex of adult rats (Yucel, *et al.*) **184,** 59
Urinary bladder, Preliminary study on biochemical changes following distension of the detrusor muscle in the rat (Greyling, *et al.*) **184,** 435
Urinary tract, Quantitative enzyme histochemical studies on autonomic neurons supplying the urinary tract in young adult and aged rats (Warburton & Santer) **184,** 200, *dem*
Uterus, Postpartum erythrophagocytosis, iron storage and iron secretion in the endometrium of the tree shrew (*Tupaia*) during pregnancy (Zeller & Kuhn) **184,** 597

Vagus nerve, Myelinated and ummyelinated axon numbers in the vagus nerve trunks of young and aged rats (Soltanpour & Santer) **184,** 201, *dem*
Varicose veins, A morphometric study on regional variation in the wall morphology of varicose long saphenous veins (Kent, *et al.*) **184,** 207, *dem*
Vascular endothelium, Localisation of nitric oxide synthase and its colocalisation with vasoactive peptides in coronary and femoral arteries. An electron microscope study (Dikranian, *et al.*) **184,** 583
Vasoactive intestinal polypeptide, Colocalisation of NADPH-diaphorase with nitric oxide synthase and vasoactive intestinal polypeptide in newborn pancreatic neurons (Tay, *et al.*) **184,** 545
Venous ligation, Haemodynamic changes in the rat femur and tibia following femoral vein ligation (Revell & Brookes) **184,** 625
Venous stasis, Haemodynamic changes in the rat femur and tibia following femoral vein ligation (Revell & Brookes) **184,** 625
Vertebrae, The incidence of posterior atlas bridging in a black and white South African sample (Asvat) **184,** 437
Vesical detrusor muscle, Preliminary study on biochemical changes following distension of the detrusor muscle in the rat (Greyling, *et al.*) **184,** 435
Villi, Morphology of intestinal villi in African antelope (Artiodactyla: Bovidae) (Woodall & Skinner) **184,** 519
Vimentin, Coexpression of different cytokeratins, vimentin and desmin in the rete testis and epididymis in the dog (Wakui, *et al.*) **184,** 147
Visual pathways, A Phaseolus lectin anterograde tracing study of the tectorotundal projections in the domestic chick (Ngo, *et al.*) **184,** 129

Wheat-germ agglutinin–horseradish peroxidase, Labelling of neurons in the rat superior cervical ganglion after injection of wheat-germ agglutinin–horseradish peroxidase into the contralateral ganglion: evidence of transneuronal labelling (Atasever, *et al.*) **184,** 93
Wing development, Development of the *Ross* chick wing from stages 19 to 36: a scanning electron microscopical study (Murray & Wilson) **184,** 194, *dem*

Zahnreihe, Zahnreihe and heterodonty in the Nile crocodile, *Crocodilus niloticus* (Kieser) **184,** 439
Zinc iodide–osmium tetroxide technique, New applications for the zinc iodide–osmium tetroxide technique (Dağdeviren, *et al.*) **184,** 83
